

## **Environmental Update May-September 2025**

- Monthly Discharge Monitoring Reports as required by the CWA discharge permit were submitted to the South Dakota Department of Agriculture and Natural Resources (SDDANR). All water discharge was within permit limits.
- GEI Consultants completed annual aquatic biological monitoring on Gold Run Creek as required by the CWA discharge permit.
- Mid Dakota Vegetation was on site to complete noxious weed spraying throughout the site.
- Requested and received a Statement of Basis from the SDDANR confirming that SURF's potential to emit air pollutants remains below the threshold requiring a CAA Operating Permit.
- Applied for and received a Temporary Discharge Permit from the SDDANR to dewater the 300L Drift for ERT Training.
- Secure Enterprise Asset Management was on site to pick up recyclable electronics, including computer towers, server equipment, laptops, computer peripherals, battery containing devices, and non-PCB capacitors.
- The Yates Compressor House Incident Follow Up Report was completed and submitted to the SDDANR following the final cleanup of the leaked oil from the legacy compressors. The legacy equipment was drained of oil prior to the cleanup and clean oil absorbents were placed near the equipment to collect residual leaking.
- Inspections required by the Stormwater Pollution Prevention Plan and the Spill Prevention Control and Countermeasure Plan were completed.
